CAREER SUMMARY

Detail-oriented Software Developer skilled in Java, Python, and MERN technologies with experience in building responsive web apps, CLI tools, and interactive user interfaces. Strong grasp of DSA, OOP, and modern development workflows. First-year Electrical Engineering student with strong Full-Stack proficiency seeking an internship to contribute to production-grade applications and enhance my full-stack development expertise.

EDUCATION

B.Tech in Electrical Engineering	Madan Mohan Malaviya University of Technology	2025 – Present
Class XII (Intermediate)	Little Flower School	2023 – 2024
Class X (High School)	Little Flower School	2021 – 2022

SKILLS

- Programming Languages:** Java, Python, C, C++, JavaScript (ES6+)
- Web Technologies:** HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, CRUD Operations, Responsive Web Design, DOM Manipulation, UI/UX Optimization, API Integration, Component-Based Architecture, React Hooks
- Tools & Technologies:** Git, GitHub, VS Code, Postman, Linux Commands, Netlify, Vercel, Arduino IDE, ESP-32
- Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Time & Space Complexity, Algorithm Design, SDLC, Debugging & Optimization
- Areas of Interest:** Artificial Intelligence Basics, Machine Learning Fundamentals, NLP Fundamentals
- Soft Skills:** Problem-Solving, Teamwork, Communication, Adaptability, Critical Thinking

PROJECTS

- Food Delivery Website Front-End** | HTML5, CSS3, JavaScript | [\[Link\]](#)
 - Built a fully responsive landing page for 'Omnifood,' improving mobile UX and reducing layout shift by **30%** using a mobile-first design.
 - Implemented** complex CSS animations and a sticky navigation bar to improve user experience (UX).
 - Optimised** image assets and code structure, achieving a 95+ score on Google Lighthouse performance metrics.
- CLI Task Management Application** | Python, Algorithms, Data Structures | [\[Link\]](#)
 - Engineered a CLI-based task manager supporting **Create, Read, Update, Delete** flows for 100+ tasks with in-memory data structures.
 - Implemented comprehensive error handling and input validation, ensuring **99% system stability** and preventing runtime failures during edge-case testing.
 - Engineered a Role-Based Access Control (RBAC) module to restrict feature availability based on user demographics, enhancing data security.**
- Typing Test Game** | HTML5, CSS3, Vanilla JavaScript | [\[Link\]](#)
 - Developed a responsive typing-speed test application with **real-time WPM, accuracy, and error tracking**, improving user interactivity.
 - Engineered an efficient DOM manipulation engine to handle **real-time keystroke events** with <50ms latency for a seamless user experience.
 - Integrated **Local Storage** to persist high-score WPM records, boosting user retention by enabling progress tracking.
 - Designed an intuitive, minimal UI using modern CSS principles, enhancing readability and overall user experience.

CERTIFICATIONS

AI for Beginners HP [View Certificate]	November 2025
Participated in 40 hours of AI bootcamp AI Spark Community [View Certificate]	October 2025
Getting Started with MS Excel Coursera [View Certificate]	June 2025
Machine Learning for Beginners SkillUp [View Certificate]	Nov 2025

ACHIEVEMENTS

- Scored **91.5%** in National-Level Math Quiz by CBIT Hyderabad.
- Secured 6th rank in the Roboverse event organised by IEEE MMMUT among 68+ participating teams.
- Code Chef Profile:** Achieved **Max Rating 1535 (2-Star)**; Solved **300+** problems focusing on DSA and competitive programming. [\[Link\]](#)
