CAREER SUMMARY

B.Tech Electrical Engineering student who builds full-stack, not just frontend or backend — React/Vue on Node.js/Express and FastAPI, with databases designed to hold up under real use. Built a real-time trip planner syncing live over Socket.IO with a 20+ endpoint API and a group-expense settlement algorithm, plus a URL shortener with Redis caching keeping redirects under 50ms. Interned as a data analyst redesigning a legacy schema across 1.2M+ records; 450+ DSA problems solved on CodeChef, top 15% globally.

EDUCATION

Madan Mohan Malaviya University of Technology

B.Tech, Electrical Engineering | CGPA: 8.0/10 (till sem-2)

July 2025 – Pursuing

Gorakhpur, India

Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Cloud & Distributed Systems fundamentals

Little Flower School

Class XII (ISC) | 80.6%

May 2024

Gorakhpur, India

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java, SQL, HTML/CSS

Frontend: React, Vue.js, Chart.js, responsive UI design

Backend & APIs: Node.js, Express, FastAPI, REST API design, WebSockets (Socket.IO), JWT authentication

Databases & Big Data: PostgreSQL, MySQL/MariaDB, MongoDB Atlas, Redis, SQLite | schema design, data warehousing, query optimization

Systems & Design: Object-oriented design, distributed systems fundamentals, RESTful architecture, application resiliency (rate limiting, input validation)

Tools & Practices: Git, Docker, Postman, Linux, Vercel (cloud deployment), Agile/Scrum

Problem-Solving: 450+ DSA problems solved across dynamic programming, graphs, greedy algorithms, and binary search, with a working focus on time/space complexity trade-offs | CodeChef 2-Star, top 15% globally

EXPERIENCE

Bold Analytics — Data Analyst Intern [Certificate]

March 2026 – May 2026

Remote | Supervisor: Yash Kale (Project Manager)

- Redesigned a legacy dataset (12 years, 1.2M+ rows) into a normalized relational schema, applying data-warehousing and schema-design principles to cut retrieval time by about 40%.
- Wrote complex SQL validation logic to catch schema and entry errors before production, protecting data integrity across 1.2M+ rows.
- Owned recurring reporting workflows end-to-end for 10+ stakeholders, replacing manual processes with structured, repeatable outputs.
- Collaborated with a 5-person cross-functional agile team, aligning technical and data requirements across departments.

PROJECTS

ByteLink — URL Shortener with Real-Time Analytics [GitHub] [Live]

React, FastAPI, Redis, SQLite, Chart.js

- Built a full-stack app end-to-end with a FastAPI backend and SQLite data layer, adding a Redis-backed caching layer to keep redirect latency under 50ms plus per-user rate limiting for application resiliency.
- Built a React/Chart.js reporting dashboard for per-country click breakdowns, consuming REST endpoints to turn raw usage data into at-a-glance analytics.

TravelSync — Real-Time Collaborative Trip Planner [GitHub]

Vue.js, Express, MongoDB, Socket.IO, JWT

- Built a Vue.js frontend backed by a Node.js/Express + MongoDB API, designing a 20+ endpoint REST API to sync itinerary and expense data in real time via Socket.IO.
- Implemented JWT-based authentication and access control, and designed a settlement algorithm to compute the minimum transactions needed to clear group balances.

HONORS AND CERTIFICATIONS

- Winner — Webnova 2026** — national-level web dev hackathon by IMS Engineering College & HackerRank Campus Crew; Certificate of Excellence with team Crimson Syndicate.
- Geodata Processing with Python & ML** [Certificate] — ISRO, Feb 2026.
- CodeChef 2-Star, Rating 1546** [Profile] — top 15% globally; 450+ problems across DP, graphs, greedy, binary search.
- Campus Representative, Elite Coders Winter Code** [Certificate] — sole MMMUT point-of-contact for a national coding contest; coordinated logistics for 100+ participants.

LEADERSHIP AND ACTIVITIES

MMMUT RESO — Executive Member [Appointment Letter]

2026 – Present

Research and Engineering Society Organization, MMMUT

- Helped grow technical event attendance to 200+ students per semester by co-organizing workshops, coding contests, and project expos — coordinating logistics and cross-team execution as one of two first-year students picked for the executive team.
